ABOUT US

SG6 is the result of the personal vocation in the fields of information security and IT best practices of its founder, Javier Medina.

Javier has focused his career in this fields since 1998.

In 2007, after gaining a vast experience and supported by a group of professionals from different IT areas, SG6 was born.

Currently after more than five years in the market, tens of customers and almost a hundred successful projects guarantee our competence.
